

Health Tips for Your Pet

BE SURE TO GIVE YOUR PETS A HIGH QUALITY DIET. Pets fed a high quality diet have a shiny hair coat, healthy skin, and bright eyes. A good diet can help strengthen your pet's immune system and much more. **DO NOT LET YOUR PET GET OVERWEIGHT**

Pets that are overweight are at risk for health issues. Obesity is the number one disease seen in pets currently; studies have shown that overweight can shorten a dog or cat's life span by as much as two years. **MAKE SURE YOU TAKE YOUR PETS TO THE VET** All pets require regular veterinary care. A routine examination can uncover health issues that you are unaware of. In many cases, an early diagnosis improves the chances of successful treatment.

KEEP YOUR PET'S MOUTH CLEAN. A common problem among dogs and cats, dental disease and oral health issues can cause your pet pain, making it difficult for him or her to eat. If left untreated, oral health issues may even lead to heart and kidney disease.

DO NOT ALLOW YOUR PET TO ROAM UNSUPERVISED. Pets that roam freely, are susceptible to many dangers, including automobile accidents, predation, exposure to contagious diseases, exposure to poisons, and more. Following these tips can go a long ways towards providing a long, healthy and happy life for your pet
