

Nikolai (the cat)

What's New Nikolai?

Meow everyone,

Here are some safety and survival tips for your loveable pets. Leaving an animal in your car can be deadly. The interior temperature of a car can rise 19 degrees in about 10 minutes, even with the windows open and at 110 degrees, serious, irreversible damage can occur to the brain and other vital organs. Much suffering and even death can occur. It's best to leave your pets home whenever possible. Pets cannot sweat like we do and therefore overheat easily.

Never give your pet any human medicine, especially acetaminophen. You may think you're doing your pet a favor but this can be extremely dangerous, even life threatening. Your pet's medicines must only come from your pet's vet. We know you love each other dearly so let's always take the proper precautions for each other's safety.

Wishing you a purrrfectly wonderful day,

Nikolai
